PROJECTS

Haritpane — Agri Service Provider Portal

09/2025 – 05/2026

Developed a responsive web application for agricultural service providers to manage farm services, bookings, quotations, and customer communication.

- Developed and maintained reusable React.js components for service listing, booking management, profile setup, and dashboard modules using functional components and React Hooks.
- Implemented client-side routing with React Router, including protected routes, role-based navigation, and dynamic layouts for multiple user types.
- Built real-time chat functionality using Socket.IO  for communication between service providers and customers.
- Integrated Firebase Cloud Messaging for push notifications and Google Places API for location-based service management.
- Implemented multi-language support (English, Hindi, Marathi) using React Context API for localization.

ICX Investor Panel

02/2026

FinTech Investment Platform | React, TypeScript, Redux Toolkit, RTK Query, Socket.IO , Vite

- Built a scalable investor dashboard SPA with 40+ screens for deal management, portfolio tracking, subscriptions, and professional services.
- Integrated REST APIs using RTK Query and implemented real-time chat using Socket.IO  and React Context API.
- Developed reusable components, protected routing, OTP-based authentication, and responsive UI with Bootstrap and React Bootstrap.
- Improved maintainability through modular folder structure, TypeScript typing, and centralized API/error handling.

Easy Healths

07/2024 – 03/2025

- Developed a healthcare platform using React.js, Redux, and REST APIs.
- Integrated Agora SDK for secure real-time video consultations.
- Implemented Socket.IO -based messaging system for doctor-patient communication.
- Configured Firebase Cloud Messaging (FCM) for push notifications.
- Integrated Razorpay payment gateway for appointment bookings.
- Developed wallet management and appointment scheduling modules.
- Improved application responsiveness and user experience across devices.

Bahula Mobile App

03/2022 – 02/2023

- This App is an e-commerce and subscription-based app where you can order one and you can subscribe any of the product and get it by your choice like one time daily and one time in week
- Technologies: React Js, Javascript, HTML CSS, Bootstrap, Redux, Tailwind css
